Aurora Boundary Definition

- Auroral energy flux map
- Fixed energy flux threshold (0.2 ergs/s/cm^2)
- Swath boundary
- GUVI based auroral model
- Global boundary
- Equatorward and poleward boundaries

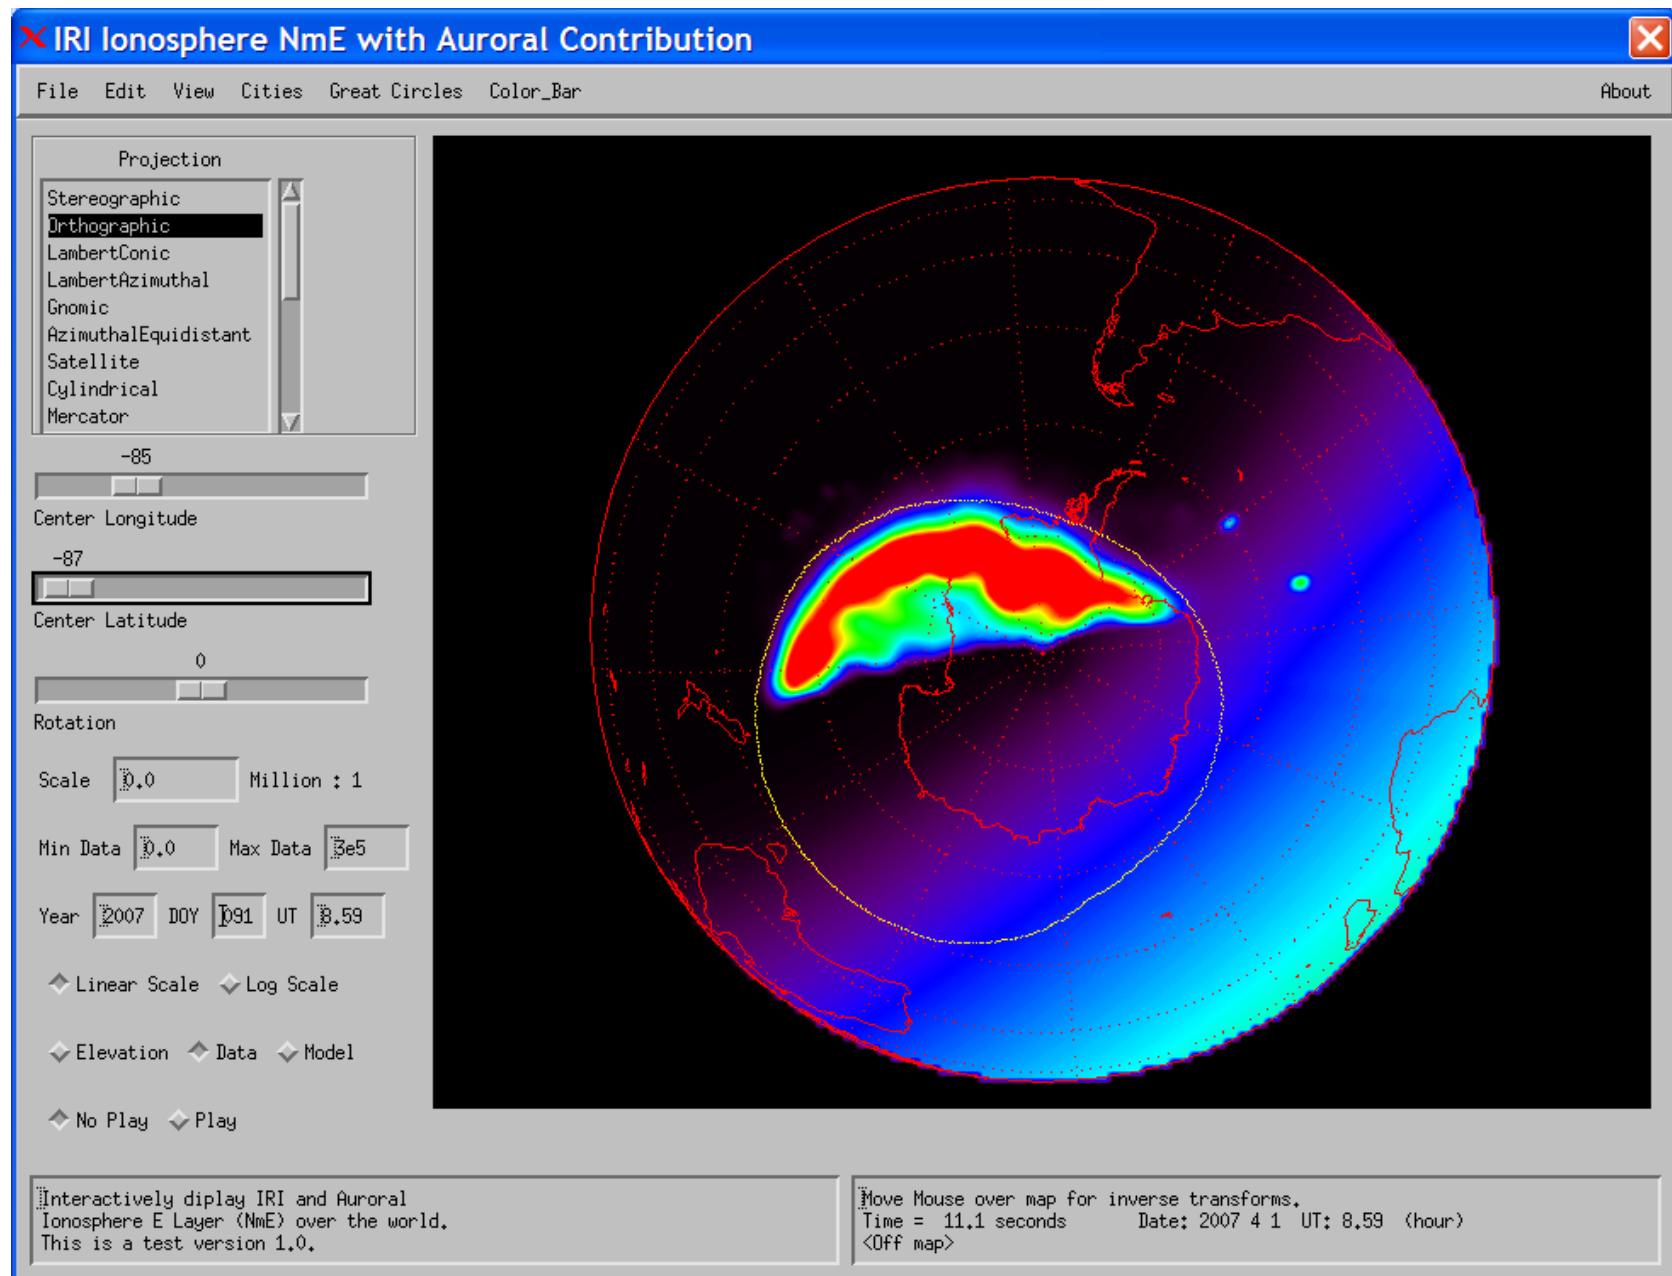

How to determine boundaries?
Flux map → equatorward and poleward swath boundaries
→ global auroral oval boundary

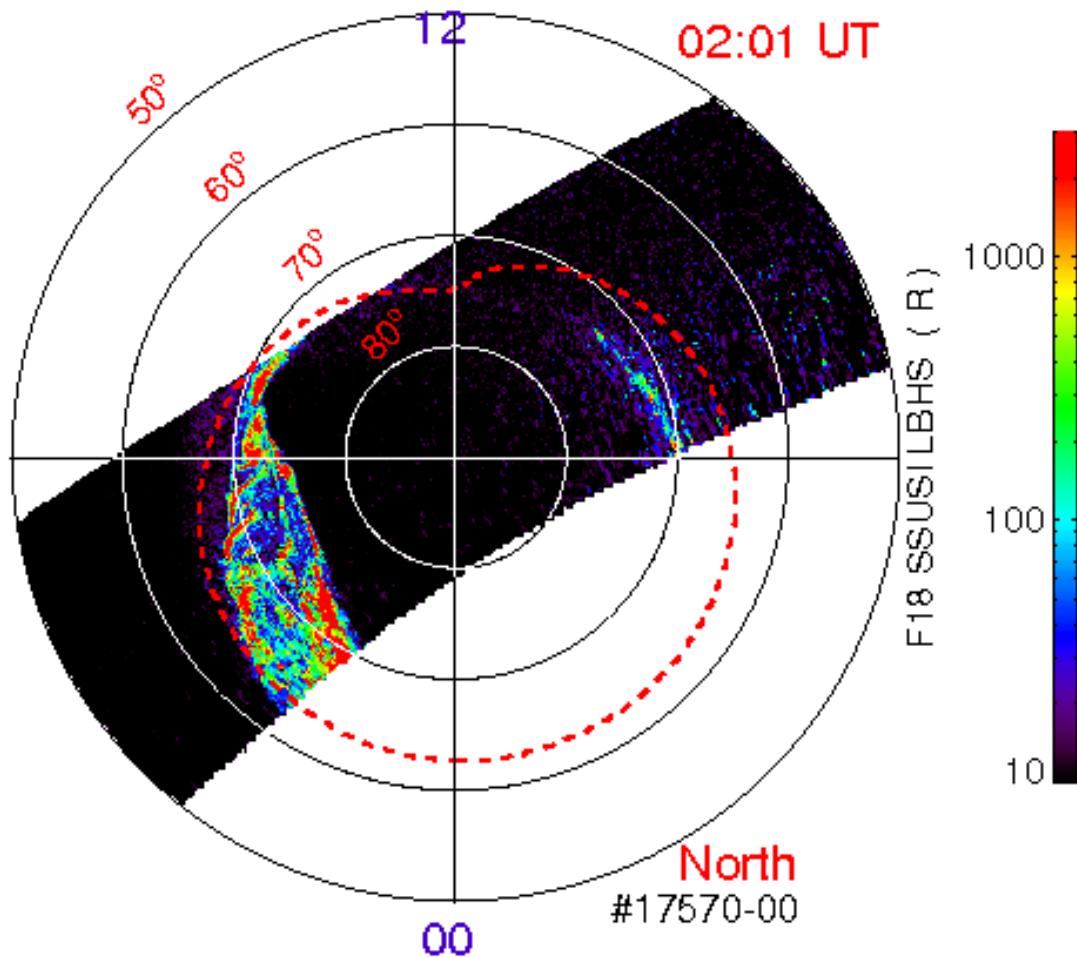

Assimilation of measured SSUSI NmE and boundary in IRI (Kp =4.3, April 1, 2007, 8:59UT)

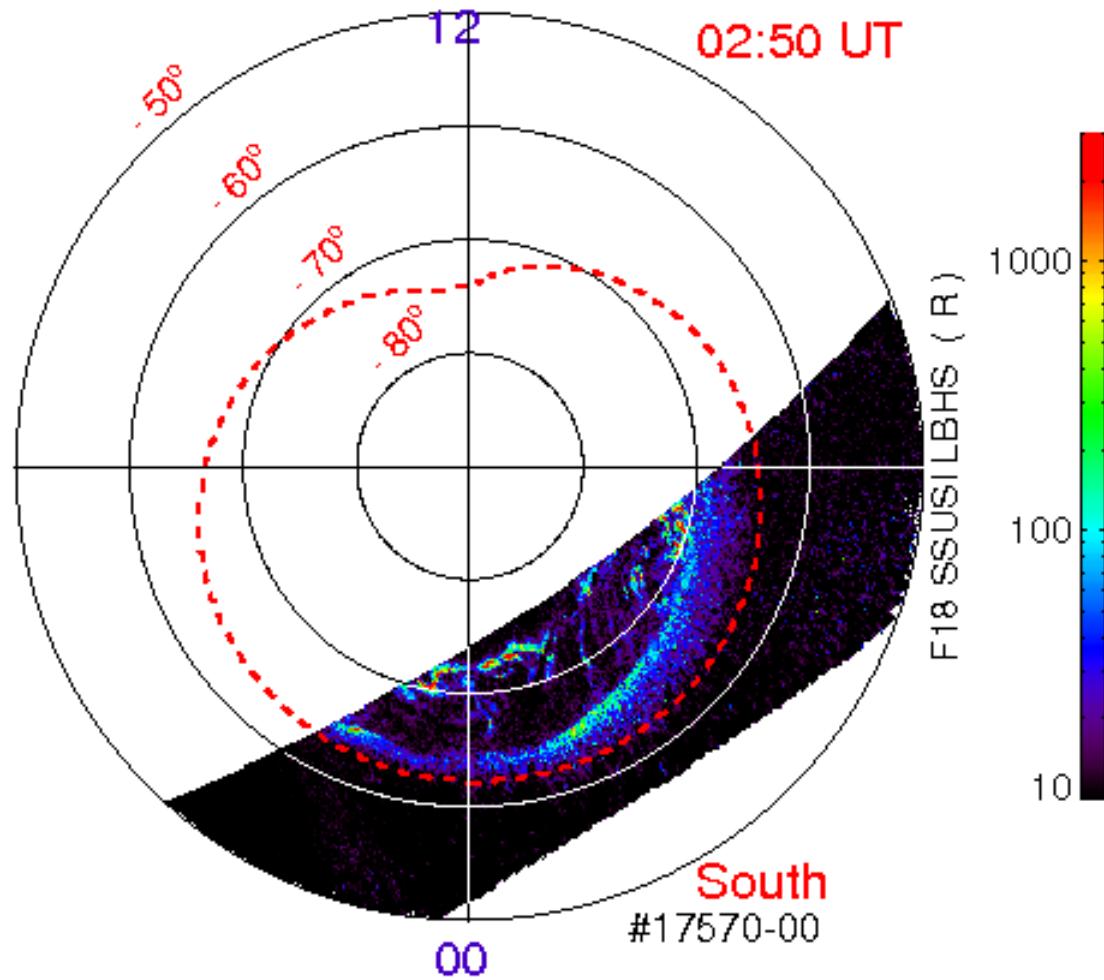

SSUSI data in southern hemisphere

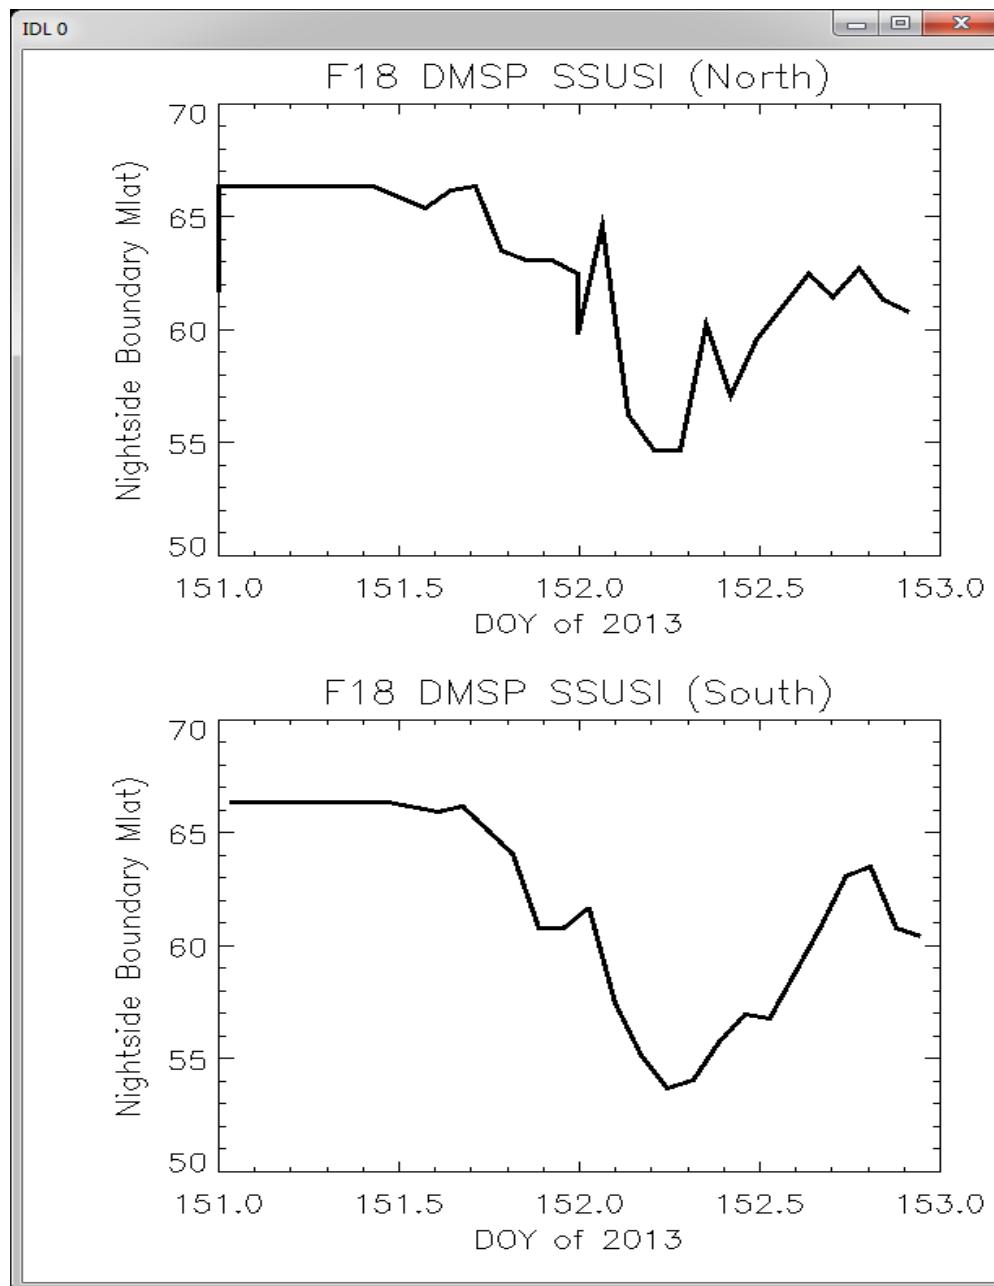

F18 SSUSI March 16, 2013

F18 SSUSI March 16, 2013

Summary
